### **\*Schools and colleges not covering full Progress 8 period**

Some schools start educating pupils partway through the 5-year period covered by Progress 8, which should be taken into account when comparing their results with schools that start at Key Stage 3. Progress 8 is not the most appropriate performance measure for university technical colleges, studio schools and some further education colleges. These establishments typically start educating pupils at age 14, with a focus on preparing pupils for their future careers by providing an integrated academic and professional education. Other headline measures, particularly pupil destinations, are more important for these establishments.
